Fund return	-11.8	19.8	89.8	-41.2	26.3
Benchmark return	-23.5	6.3	84.0	-48.6	29.6

### Manager's comments

- The Indian market fell in April, underperforming regional markets.
- The central bank cut interest rates for the first time in a few years signalling that they are worried about growth.
- However, inflation remains high and the rate cuts were not warranted in our view.
- The Ministry of Finance directed state owned banks to cut interest rates immediately after the central bank's move, indicating that these banks are not run in the interest of shareholders in India.
- There was no significant transaction activity over the month.
- Due to the lack of transparency, we continue to tread cautiously on companies which depend or thrive on dealing with the government.
- Although most of our favourite stocks are fairly valued at present, we believe they offer good growth potential over the long-term.

### Fund information

Launch date	23/08/1999

### Important Information / Risk Factors:

Past performance is not a guide to future performance, and investment markets and conditions can change rapidly. If your fund invests in equity markets, it will be more volatile than an investment in cash or fixed deposits. The value of your investment may go down as well as up. There is no guarantee you will get back the amount invested. If your fund invests in overseas markets, currency movements may affect both the income received and the capital value of your investment. If it invests in the shares of small companies, in emerging markets, or in a single country or sector, it may be less liquid and more volatile than a broadly diversified fund investing in developed equity markets. This fund should be considered a long-term investment. You should read the fund's Prospectus before investing, including in particular the sections on the risk factors applicable to any investment. The views expressed herein should not be relied upon when making investment decisions.

Statistical sources: All performance data as at 30 April 2012 : Source for fund - First State (using Barra Enterprise Performance), net of fees with income reinvested gross of tax; source for benchmark - RIMES, income reinvested gross of tax.
